Mind

The aspect of a person that enables perception, thinking, consciousness, and rationality. It encompasses mental processes such as cognition, memory, emotion, and the ability to reason and make decisions.

Balance

The state of equilibrium and harmony between the mind, body, and soul, leading to overall well-being and optimal functioning.

Body

The physical structure of a being, including the organs, tissues, and cells, which enable the individual to interact with the environment.

Soul

The spiritual essence or inner self, often considered the source of a person's beliefs, values, and emotions, which guides their actions and decisions.
